

IMMUNE PLUS

Vitamin & Mineral Formula

Immunity

The immune system is the body's defence against germs, viruses and other invaders. Each day our children are exposed to a host of natural and man-made pollutants that, along with a poor diet can reduce the body's natural defence systems. For that reason, a balanced diet is probably the most important consideration in maintaining a healthy immune system, and Healthy Rascal's Immune Plus provides a range of immune supporting nutrient to fill any gaps in the daily diet.

Healthy Rascal's Immune Plus are tiny little capsules that provide a powerful formulation developed especially for children, to help support the immune system in several ways. Vitamin C is well known as an immune booster but it also contributes to normal collagen formation for the normal function of blood vessels, bones, cartilage, gums, skin and teeth, normal energy-yielding metabolism and a reduction of tiredness and fatigue. With zinc for cognitive function and maintenance of normal vision, and Iron for formation of red blood cells and oxygen transportation in the body, this daily immune formula is an ideal daily nutrition supplement. Immune Plus also contains Beta 1-3, 1-6 Glucan; a natural form of soluble dietary fibre which provides a role in activating the immune system. Beta glucan potentiation of the immune response is systemic, activating the immune system throughout the whole body.
