

Joint Support

High quality nutrition to support your pet's joints

WHY DOES YOUR PET NEED THIS SUPPLEMENT?

As your pets get older they are often slowed down by the wear and tear on their joints and connective tissues. This can bring stiffness, discomfort and restricted movement, which can affect quality of life for your pet. Young growing dogs also need good nutrition to help develop strong, flexible joints, and to support recovery to joint injuries.

Joint Support is an advanced and revolutionary joint support supplement formulated with 100% natural food ingredients individually chosen for their ability to promote healthy and free moving joints in ageing pets, and to support strong joints in young, growing dogs. This formula includes, glucosamine, chondroitin, and MSM (Methylsulfonylmethane). MSM is rich in organic sulphur, an important 'building block' for healthy bones and joints. Sulphur, which is a major component of MSM, plays an important role in making collagen and glucosamine, both of which are vital for healthy bones and joints.
