

# SUPER BEARS

Chewy Bear Shaped Multivitamin

## Vitamins and Minerals

A healthy, balanced, varied diet is important in maintaining good health, but it's sometimes difficult to obtain the full amount of the broad spectrum of nutrients children require to stay healthy and active. A lack of nutrients in the soil, modern day farming processes, cold storage, processed food, and cooking can seriously deplete the nutrition in our food. Vegan friendly Super Bears Multi Vitamins and Minerals provides a comprehensive nutritional formula that will help to make up for any shortfall in your children's daily diet.

Chewable Super Bears are in a 'food complex' that's gentle on the tummy and readily absorbed by the body. Each chewy fruity bear contains a full spectrum of nutrients at the levels children need for optimum health. This special formula includes vitamins C, which contributes to immune function, the nervous system, and normal collagen formation for skin, bones, teeth, gums and cartilage. Vitamin D to maintain normal growth and development of bone in children, and B-Complex Vitamins for energy-yielding metabolism, and a reduction in tiredness and fatigue. Super Bears are free from artificial colours, flavours and GM ingredients.
